

R&D Snapshot

Rotational Outdoor Piggeries – videos and factsheets

Investigators: Robyn Tucker (Principal Investigator), Livestock Environment and Planning and Stephen Wiedemann, Integrity Ag Services (formerly FSA Consulting)

Purpose:

To provide practical information factsheets and videos on outdoor production that demonstrate best management practice.

Take home messages:

- This extension material was commissioned by Australian Pork Limited and is designed to assist Australian outdoor rotational pig producers to adopt best environmental management and planning practices
- Video topics include:
 - selecting a good site
 - land protection
 - promoting even nutrient distribution
 - soil testing
- Factsheet topics include:
 - design and management of rotational outdoor piggeries
 - developing a nutrient management plan for rotational outdoor piggeries
 - land and water protection measures for rotational outdoor piggeries
 - soil monitoring for rotational outdoor piggeries
 - the use of electromagnetic technology to determine nutrient distribution in rotational outdoor piggeries
- The factsheets and video links are available on the APL website at <http://australianpork.com.au/industry-focus/environment/outdoor-production/>
