

R&D Snapshot

Explainer Videos: Planning Requirements for indoor and outdoor piggeries

Investigators: Robyn Tucker (Principal Investigator), Livestock Environment and Planning, and Porter Novelli

Purpose:

- To provide guidance on planning requirements and assessment of planning permit applications for both indoor and outdoor piggeries using explainer videos.

Take home messages:

- Planning requirements vary from state to state. In most cases, keeping more than a few pigs triggers a planning or development permit.
- Two explainer videos, for indoor and outdoor piggeries, have been developed to enable planners to better understand:
 - when piggeries require planning or development approval,
 - what the major environmental considerations are,
 - what information should accompany an application, and
 - the guidelines that will be most useful in assessing applications.
- Video links are available at <http://australianpork.com.au/industry-focus/environment/planning-and-development/>
