International and National news

Rising demand from Turkey, Italy and the Netherlands bolstered Ukraine's weekly wheat exports with over double the previous week's volume transported. 1.092 million tonnes have been shipped, however for the marketing year they are still 19 per cent, reflecting that global market sentiment of ample supply.

The United States Spring Wheat planting progress has continued to lift this week with the latest data from the USDA showing that six per cent has been completed, meanwhile Winter wheat heading has continued, sitting at 11 per cent, up from previous years due to more favorable seasonal conditions.

Poor crop ratings, ample global supply, export demand and the conflict in the Middle East have all weighed in on international grain futures as the wheat market increased and canola declined this week.

Local grain prices are diverging nationally, with strong demand and dryness driving wheat and barley values higher in northern regions, while southern and western markets remain more subdued or mixed, and canola has softened across all states due to global factors.

Seeding is progressing well in southern and western states following timely rainfall, while growers in northern NSW and Queensland remain cautious as they await rain, with market engagement low across the country as all focus shifts to fieldwork.

Wheat

QLD/Nth NSW

Local markets remain firm, with the weather outlook largely unchanged. Some growers are considering reducing or foregoing wheat plantings this season, as rising urea prices move beyond economically viable levels. Current indications of AUG–SEP urea pricing around \$1,520/t ex-Brisbane are expected to make nitrogen application decisions increasingly challenging. New crop wheat bids, currently around \$430/t delivered Downs, have seen limited grower engagement as production risk remains front of mind.

Sth NSW/VIC/SA

Markets have once again held steady week-on-week, with liquidity remaining slow across most channels. Domestic end-user buying and trade replacement against existing contracts continue to provide the most consistent day-to-day support, while exporter participation has been intermittent, contributing to a thin and fragile bid side. Exporters are increasingly vocal about the challenges around overall export competitiveness, with geopolitical uncertainty now adding another layer of pressure to an already cautious market backdrop.

Barley

Sth QLD/Nth NSW

An unfavourable crop outlook continues to support both spot and new crop pricing, as lot feeders and trade buyers look to extend coverage amid tightening supply. Grower selling has slowed, with many becoming increasingly cautious as prices trend higher. While current pricing levels are considered attractive, many growers remain hesitant to forward sell, particularly as dry conditions persist and production uncertainty remains elevated.

Sth NSW/VIC

Barley values remain steady in headline delivered markets, while up-country prices are finding support in northern areas of the state – where demand appears to be drawing grain north rather than south. Although traded volumes are unclear, tightening supply across northern NSW and southern Queensland, driven by ongoing dry conditions, is likely to push prices toward an equilibrium.

Sorghum

QLD

A strengthening AUD has placed downward pressure on port-based pricing this week, while local Downs packing facilities have been less reactive to currency movements as they continue to compete with bulk export demand. A considerable volume of crop remains to be harvested across the Downs before the Central Queensland harvest begins; however, current weather activity may result in delays. Chinese demand continues to be the primary driver of local pricing, with most feedlots still reluctant to feed sorghum.
